CO₂ emissions from end energy consumption (balance at source) by sector 1)

	1990	2000	2002	2004	2006	2008	2010	2012	2014
CO ₂ emissions, total (in 1,000 t)	29,215	25,217	25,547	23,577	22,406	20,776	22,225	20,662	19,921
Industry	5,224	2,810	2,815	1,809	2,001	2,012	1,723	1,663	1,353
Traffic	5,055	5,783	5,768	5,491	5,103	4,933	4,873	4,955	5,542
Road traffic	3,685	4,145	3,977	3,855	3,501	3,393	3,411	3,460	3,982
Rail traffic	973	818	956	800	629	538	496	537	513
Inland navigation	34	29	25	29	28	14	25	33	41
Air traffic	363	791	810	807	945	988	941	925	1.006
Households/small-scale consumers	18,939	16,624	16,965	16,277	15,302	13,831	15,628	14,044	13,025

${\rm CO_2}$ emissions from end energy consumption (balance at source) by sector 1)

 $^{^{1)}}$ The statistical report on the energy and CO $_2$ footprint is produced out at three-year intervals. It is published three years in arrears. Source: Joint Statistics Office of the States of Berlin and Brandenburg – 'Energy and CO $_2$ footprint in Berlin 2014'
